If you have any questions please contact Scott Fisher, Recycling Coordinator at 201-891-7000 ext 402.

DISPOSAL OF BUILDING MATERIALS

It is important that property owners comply with the Township of Wyckoff's trash and refuse collection regulations when undertaking any renovation or structural alteration.

Wyckoff's garbage and trash collection is an essential service program and it has been designed to benefit taxpayers in an efficient and equitable manner. It is structured to provide collection of the usual daily household garbage and trash materials that are generated by everyone. It is unfair to burden the taxpayer with costs for collection and disposal of materials generated by renovations or construction.

Property owners or contractors are required to arrange for separate, private pick up of building materials when planning any building improvements. Contractors should be aware that the Townships recycling ordinance requires recycling of construction and demolition materials. Recycling provides a less expensive way to dispose of many materials. Listed below, for information only, are area recycling markets for various materials. The Township makes their list of potential markets available as a courtesy and the Township does not recommend or endorse any markets. Property owners and contractors are to utilize their own separate and independent judgment when contracting with a recyclable market. We do request that a tonnage report be provided to the Township of Wyckoff Recycling Coordinator by the recyclable market itself.
